INDEX TO SUBJECTS

A

Acid, gamma-aminobutyric, involvement of, in organization of cat retinal ganglion cell receptive fields, study with picrotoxin and bicuculline, 465

Activity, spontaneous mechanical, in depolarized frog ventricle, 145

Adaptation processes, biochemical correlates of, in isolated frog photoreceptor membranes, 1

Aggregation, hemoglobin, analysis of, from Gibbs-Donnan equilibrium experiments, 105

Amiloride and some of its analogues, effect of on cation transport in isolated frog skin and thin lipid membranes, 43

Aminobutyric acid, gamma-, in organization of cat retinal ganglion cell receptive fields, study with picrotoxin and bicuculline, 465

Aminopyridine block of potassium channels in squid axon membrane, dynamics of, 519

Antibody, anti-L, and intracellular potassium, effects of, on passive potassium transport in LK sheep red cells, 567

Antidiuretic hormone, nature of water permeability increase induced by, in toad urinary bladder and related tissues, 137

Aplysia eye, isolated, circadian rhythm of neuronal activity in, phase shifting with puromycin and cycloheximide, electrophysiological and biochemical studies, 359

Axon membrane, squid, dynamics of aminopyridine block of potassium channels in, 519

– membrane, squid, labeled with tritiated *N*-ethylmaleimide, release of proteins from inner surface of, 385

Axons, *Myxicola*, potassium current kinetics in, effects of conditioning prepulses, 397

–, squid giant, axoplasmic free magnesium levels and magnesium extrusion from, 159

B

Balanus photoreceptors, intracellular Na^+, K^+, and Cl^- activities in, 281

Bicarbonate-chloride exchange across human red blood cell membrane, kinetics of, 633

Bicuculline and picrotoxin, gamma-aminobutyric acid in organization of cat retinal ganglion cell receptive fields, 465

Bladder, turtle urinary, active H^+ transport in, coupling to glucose oxidation, 421

Boltenia ovifera, tunicate, single cell-layered heart of, electromechanical properties of, 503

Butyric acid, gamma-amino-, in organization of cat retinal ganglion cell receptive fields, study with picrotoxin and bicuculline, 465

C

Calcium transport in intact human erythrocytes, 29

Cell, bag, neurons, of *Aplysia californica*, precursor and product processing in, 211

– volume, transepithelial sodium transport, and potassium exchange in rabbit ileum, 441

Cells, heart, cultured, contraction frequency of, effect of verapamil and of extracellular sodium and potassium on, 537

Channel, sodium, in *Myxicola*, permeability of to alkali cations, 327

–, sodium, in *Myxicola*, permeability of to organic cations, 551

–, sodium, in squid axon membranes, selectivity, 111

Channels, potassium, in squid axon membrane, dynamics of aminopyridine block of, 519

Chloride and bicarbonate exchange across human red blood cell membrane, kinetics of, 633

–, (Cl^-), Na^+, and K^+, intracellular activities in *Balanus* photoreceptors, 281

Chloride transport, furosemide inhibition of, in human red blood cells, 583
Chromaffin granules, isolated, ion permeability of, 601
Cone pigments in goldfish, spectral relations of, 65
Contraction frequency of cultured heart cells, effect of verapamil and of extracellular sodium and potassium on, 537
CORRECTION 679
Coupling, length-dependent, electromechanical, in single muscle fibers, 653
Cycle, rhodopsin, in *Limulus* ventral photoreceptors, analysis of, using early receptor potential, 487
Cycloheximide, and puromycin, phase shifting circadian rhythm of neuronal activity with, in isolated *Aplysia* eye, electrophysiological and biochemical studies, 359

D

Dissociation, temporal, of energy liberation and high energy phosphate splitting during shortening in frog skeletal muscles, 13
Diuretic, anti-, hormone, nature of water permeability increase induced by, in toad urinary bladder and related tissues, 137
Dynamics of aminopyridine block of potassium channels in squid axon membrane, 519

E

Electrolyte, non-, and water permeability of lipid bilayer membranes, 127
Electromechanical properties of the single cell-layered heart of the tunicate *Boltenia ovifera*, 503
Energy liberation and high energy phosphate splitting, temporal dissociation of, during shortening in frog skeletal muscles, 13
Epithelium, coelenterate glandular, propagated spikes and secretion in, 313
Equilibrium experiments, Gibbs-Donnan, analysis of hemoglobin aggregation from, 105
Erythrocyte membrane, human, kinetics of chloride-bicarbonate exchange across, 633
Erythrocytes, human, furosemide inhibition of chloride transport in, 583
–, intact human, calcium transport in, 29
–, LK sheep, passive potassium transport in, effects of anti-L antibody and intracellular potassium, 567
N-Ethylmaleimide, tritiated, squid axon membrane labeled with, release of proteins from inner surface of, 385

F

Fibers, frog skeletal muscle, isolated, sarcomere lengthening and tension drop in latent period of, 247
–, skinned crayfish single muscle, two rigor states in, 267
–, single muscle, length-dependent electromechanical coupling in, 653
–, squid nerve, binding of tetrodotoxin to, 95
Frequency, contraction, of cultured heart cells, effect of verapamil and of extracellular sodium and potassium on, 537
Furosemide inhibition of chloride transport, in human red blood cells, 583

G

Glucose oxidation, coupling of active H^+ transport to, in turtle urinary bladder, 421
Granules, chromaffin, isolated, ion permeability of, 601

H

Heart, single cell layered, of tunicate *Boltenia ovifera*, electromechanical properties of, 503
– cells, cultured, contraction frequency of, effect of verapamil and of extracellular sodium and potassium on, 537
Hemoglobin aggregation from Gibbs-Donnan equilibrium experiments, analysis of, 105
Hormone, antidiuretic, nature of water permeability increase induced by, in toad urinary bladder and related tissues, 137
–, egg-laying, in *Aplysia californica*, biochemical isolation and physiological identification of, 197
Hydrogen ion concentration, in frog skeletal muscle, spectrophotometric studies on, 179

– transport, active, in turtle urinary bladder, coupling of, to glucose oxidation, 421

L

Limulus ventral photoreceptors, rhodopsin cycle in, analysis of, using early receptor potential, 487

M

Magnesium, free, axoplasmic levels, and magnesium extrusion from squid giant axons, 159
Maleimide, tritiated *N*-ethyl-, squid axon membrane labeled with, release of proteins from inner surface of, 385
Man, intact erythrocytes, calcium transport in, 29
–, red blood cell membrane of, kinetics of chloride-bicarbonate exchange across, 633
–, red blood cells of, furosemide inhibition of chloride transport in, 583
Membrane, human red blood cell, kinetics of chloride-bicarbonate exchange across, 633
–, squid axon, dynamics of amino-pyridine block of potassium channels in, 519
–, squid axon, labeled with tritiated *N*-ethylmaleimide, release of proteins from inner surface of, 385
Membranes, isolated frog photoreceptor, biochemical correlates of adaptation processes in, 1
–, lipid bilayer, water and nonelectrolyte permeability of, 127
–, thin lipid, and isolated frog skin, effect of amiloride and some of its analogues and cation transport in, 43
Modification, neural, by paired sensory stimuli, 341
Mucosa, nasal, topographical projection of onto olfactory bulb of frog, electrophysiological evidence, 297
Muscle, active, striated, re-examination of the thermoelastic effect in, 81
–, fibers, crayfish, single, skinned, two rigor states in, 267
– fibers, frog skeletal, isolated, sarcomere lengthering and tension drop in latent period of, 247
– fibers, single, length-dependent electromechanical coupling in, 653
–, frog skeletal, metabolically poisoned, strophanthidin-sensitive sodium fluxes in, 405
–, frog skeletal, pH of, spectrophotometric studies on, 179
Myxicola axons, potassium current kinetics in, effects of conditioning prepulses, 397

N

Nerve fibers, squid, binding of tetrodotoxin to, 95
Neurons, bag cell, of *Aplysia californica*, precursor and product processing in, 211
Nonelectrolyte and water permeability of lipid bilayer membranes, 127

P

Permeability, water and nonelectrolyte, of lipid bilayer membranes, 127
– increase, water, nature of, induced by antidiuretic hormone in toad urinary bladder and related tissues, 137
–, ion, of isolated chromaffin granules, 601
– of sodium channel in *Myxicola* to alkali cations, 327
– of sodium channel in *Myxicola* to organic cations, 551
Phosphate splitting, high energy, and energy liberation, temporal dissociation during shortening in frog skeletal muscles, 13
Picrotoxin and bicuculline, gamma-aminobutyric acid in organization of cat retinal ganglion cell receptive fields, 465
Pigments, cone, in goldfish, spectral relations of, 65
Potassium and sodium, extracellular, and verapamil, effect on contraction frequency of cultured heart cells, 537
– channels, in squid axon membrane, dynamics of aminopyridine block of, 519
– current kinetics in *Myxicola* axons, effects of conditioning prepulses, 397
– exchange, transepithelial sodium transport, and cell volume, in rabbit ileum, 441
–, intracellular, and anti-L antibody, effects on passive potassium transport in LK sheep red cells, 567

– , Na^+, and Cl^-, intracellular activities in *Balanus* photoreceptors 281
– transport, passive, in LK sheep red cells, effects of anti-L antibody and intracellular potassium, 567
Precursor and product processing in bag cell neurons of *Aplysia californica*, 211
Product and precursor, in bag cell neurons of *Aplysia californica*, processing, 211
Proteins, release of, from inner surface of squid axon membrane labeled with tritiated *N*-ethylmaleimide, 385
Puromycin and cycloheximide, phase shifting circadian rhythm of neuronal activity in isolated *Aplysia* eye with, electrophysiological and biochemical studies, 359

R

Rhodopsin cycle in *Limulus* ventral photoreceptors, using early receptor potential, 487
Rhythm, circadian, of neuronal activity in isolated *Aplysia* eye, phase shifting with puromycin and cycloheximide, electrophysiological and biochemical studies, 359
Rigor states, two, in skinned crayfish single muscle fibers, 267

S

Sarcomere lengthening and tension drop in latent period of isolated frog skeletal muscle fibers, 247
Sea potato, *Boltenia ovifera*, tunicate, electromechanical properties of single cell-layered heart, 503
Secretion, and propagated spikes, in coelenterate glandular epithelium, 313
Sodium, K^+, and Cl^-, intracellular activities in *Balanus* photoreceptors, 281
– and potassium, extracellular, and verapamil, effect on contraction frequency of cultured heart cells, 537
Sodium channel in *Myxicola*, permeability of, to alkali cations, 327
– channel in *Myxicola*, permeability of to organic cations, 551
– channel selectivity, in squid axon membranes, 111
– fluxes, strophanthidin-sensitive, in metabolically poisoned frog skeletal muscle, 405
– transport, transepithelial, potassium exchange, and cell volume, relations among, in rabbit ileum, 441
Stimuli, paired sensory, neural modification by, 327
Strophanthidin-sensitive sodium fluxes in metabolically poisoned frog skeletal muscle, 405

T

Tension drop and sarcomere lengthening in latent period of isolated frog skeletal muscle fibers, 247
Tetrodotoxin, binding to squid nerve fibers, 95
Transduction process, photoreceptor, nonlocal interactions in, 227

V

Verapamil and extracellular sodium and potassium, in contraction frequency of cultured heart cells, 537

W

Water and nonelectrolyte permeability of lipid bilayer membranes, 127
– permeability increase, nature of, induced by antidiuretic hormone, in toad urinary bladder and related tissues, 137

Statement of Ownership, Management, and Circulation required by Act of 12 August 1970; Section 3685, Title 39, United States Code: The Journal of General Physiology, published monthly at 1230 York Ave, New York 10021 by The Rockefeller University Press, New York 10021. Editor: Paul F. Cranefield, The Rockefeller University, New York 10021. Owned by The Rockefeller University, New York 10021, nonprofit corporation, authorized to mail at special rates. Purpose, function, and nonprofit status of the organization and the exempt status for Federal income tax purposes have not changed during the preceding 12 months. Following statistics represent 12 month average and number nearest to date of filing: copies printed for each issue, 2660; sales through dealers, street vendors, counter sales, 0; mail subscriptions, 2316. Total paid circulation, 2316; free distribution, 57; office use, left-over, unaccounted, spoiled, 287; net press run, 2660. Single issue nearest filing date Oct. 1976.
